INTERDEPARTMENTAL COMMUNICATION

Date: March 20, 1997

To: Joan Connolly MS 3910 6-1023

From: Doug Greenwell *D.G.* MS 3953 6-0858

Subject: WASTE AREA GROUP (WAG) 3 CORE SAMPLES - RDG-03-97

Core samples were obtained through separate WAG 3 investigations to determine the surrounding geological composition. These core samples have been incorrectly listed under the investigation derived waste (IDW) project as waste. The core samples provide the USGS with valuable information concerning the surrounding geology, therefore, these samples must not be disposed of as waste and should be eliminated from the IDW project list.

The core samples should be properly boxed and consolidated with other radioactive core samples currently being stored at CPP-1608 awaiting transfer to the USGS core library.

The core samples originate from the following areas:

CPP-01-2
CPP-01-3
MW-07

If you have any questions, please call me at 6-0858.
